

**Key:**

1. CONIPUR® spray/hand applied highly elastomeric waterproof membrane.
2. THORO® WATERPLUG ultra-rapid setting mortar for crack sealing and rapid anchoring of metalwork in damp/wet conditions.
3. EMACO® NANOCRETE, THORO® Structurite repair mortars, suitable for profiles and corners.
4. THOROSEAL® FX100 elastomeric waterproof coating for concrete/masonry in water-retaining structures.
5. THORO® FLEX 200 dynamic joint waterproofing system approved for use with potable water.
6. THORO® DRYJOINT pointing mortar for bricks, stone and concrete.
7. THORO® STRUCTURITE DWI approved rapid-setting, high-strength structural repair mortar.
8. MASTERFLEX® 900 re-injectable hose waterstop system for construction and cold joints in concrete.
9. MASTERSEAL® 345 spray-applied waterproofing membrane (for sandwich construction).
10. Glenium® and RheoFIT® admixtures to achieve durable performance.
