

Key:

1. GLENIUM® high range water reducing superplasticisers and RheoFIT® water resisting admixtures, suitable for reinforced concrete: ground slabs, walls and foundations.
2. GLENIUM® high range water reducing superplasticisers within blinding concrete under slabs/foundations.
3. MASTERFLEX® polyurethane resin joint sealants, THORO® FLEX dynamic joint waterproofing system.
4. CONIPUR® M805 chemically resistant polyurea coating.
5. EMACO® Nanocrete polymer-modified repair mortars, THORO® Structurite rapid-setting high-strength structural repair mortars.
6. MASTERFLEX® 900 reinjectable hose system for construction joints.
7. EMACO® FAST concrete repair mortars for ultra-rapid strength build up.
8. UCRETE® RG render grade heavy-duty polyurethane screed with exceptional chemical and heavy impact-resistance.
